

Tru-Liner

Ice Painter

**Radius and Face off circles
in less than 30 minutes!**

Clean and Exact Lines or Circles

The **Tru-Liner** Ice Painter applies liquid ice paints to a prepared ice surface with ease. It is ideal for painting 2" lines and circles saving time versus painting by hand.

The liner will produce a clean and exact line or circle with little effort.

The **Tru-Liner** Painter includes the following:

An aluminum (non-rusting) paint reservoir tray system with a "T" handle. The handle has a convenient shut off mechanism to control the flow of paint to the brush. The paint stored in the reservoir tray is disbursed through an opening in the bottom of the tray which flows onto the two (2") brush. The unit is supported on steel bars/skates that allows the unit to glide along the ice applying the liquid paint to the ice.

The amount of ice paint can be metered and controlled by the handle shut-off easily by turning the valve clock wise or counter clock wise.

The **Tru-Liner** Painter comes complete with a (3 piece) pre-drilled-colour coded radius bars that will accommodate face-off, referee and goal crease radiuses.

Time Saving Features

- Quick and precise line painting.
- The painting of all face-off and other radius circles can be completed in less than 30 minutes.
- Use less liquid ice paint. Saving on the purchase of ice paint.
- Professional looking line markings.
- **Tru-Liner** Line Painter (assembled by ICECO) comes completely assembled and ready to paint. Complete assembly and instructions included.
